Sub : Opinion regarding the structural Stability of the School Building at Preet Vihar, Delhi.

Dear Sir,

During our visit (Architect kamal Gajjar, and Structural Consultant Bipin Parikh) of the School Building, on 16 th July 2015, our observation are as under.

So far as Elevation and maintainance of the structure is concerned, We are of the opinion that the management has taken thorough care to keep the School Building as if it is new one. Painting to the exposed brick work, we feel that the 100 % care has been given to maintain the shade of the colour as well as its durability is concerned.

The polished ladi flooring has been given importance for its polishing, and necessary cleaning at regular intervals has been given proper attention to keep its surface clean.

So far as plumbing and water supply and claning of the fixtures is concerned, over all care has been taken and no leakage of the pipe line of water supply as well as drainage, has been found. We feel that original urinal pots have been replaced, and latest type of urinal pots are fixed.

Doors and Windows are found easily operated.

There may have been appeared the cracks, in plaster as well as R.C.C work, as the School Building is nearly 20 years old, but in our opinion, the management after consulting the consultant of the respective line, those may have rectified. At present the School Building has been found as if it is a new one.

Some R.C.C. work has been found as if corrosion has taken place, and requires some type of strengthening it. We have given some advice, for rectifying it. We have seen that the management has taken the steps to rectrify those patches.

Overall the Management is taking full interest to keep the building best in appeance as well as its sturctural stability.
